SVM320: Walvoil's new hydraulic joystick

21 October 2019 by Walvoil

At Agritechnica Walvoil is going to introduce the market the new SVM320 hydraulic joystick. It is an innovative, original, solid and reliable product particularly suitable for forestry applications and it is completely adaptable to customer's needs by the modularity of the fixing flanges and the endless possibilities of completion thanks to the compatibility with its whole range of products.

Thanks to its design, the new hydraulic joystick allows to manage and regulate flow rates with lower operating forces than the entire standard range may do.

The cast iron body ensures high durability, greater resistance to oil contamination and

maintain unchanged features during the joystick life cycle.

Main characteristics:

- Low drive force
- Cast iron body for high strength and reliability
- Compatible with the whole range of Walvoil handles
- Compact design and dimension
