WE ARE PLEASED TO INVITE YOU

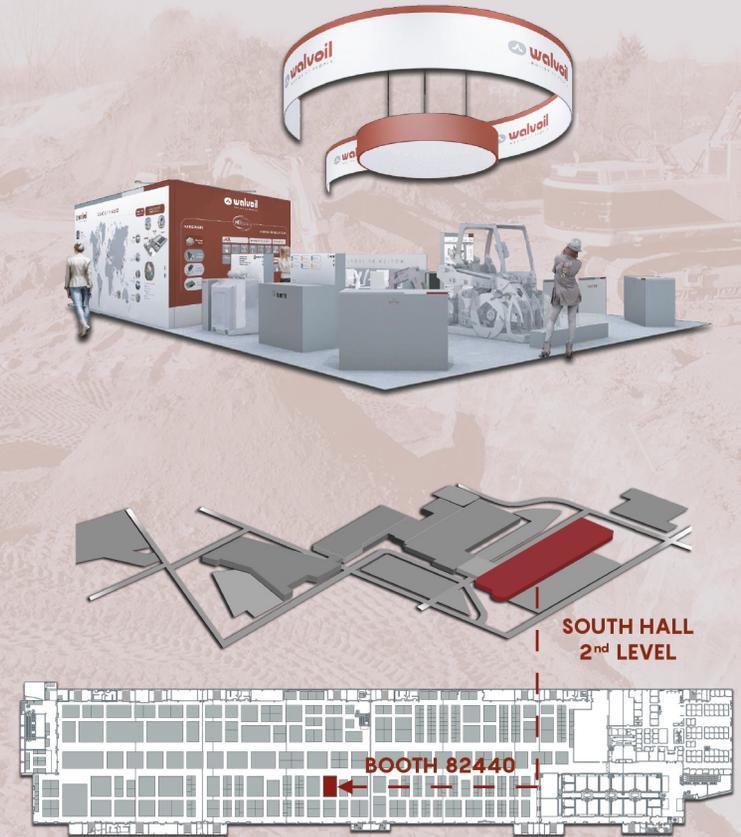

AT CONEXPO 2026

Offering the most appropriate solutions to meet our customers' needs remains our priority. That's why we will be at Conexpo with the **latest developments in our product ranges and the evolution of our Hydraulic Digital Solutions.**

Digitalisation and Model-Based Design, which integrates modelling, simulation, and automated implementation to improve efficiency, reduce development costs, and ensure system correctness from concept to deployment, will play a prominent role thanks to **Walvoil's Digital Applications.**

Kaleidos, a visionary prototype that combines functionalities dedicated to the construction world with that of agricultural and lifting, represents a tangible sign of our collaboration with partner companies in the Interpump Group and what we can offer the construction industry. Interested to discover and learn more?

MEET YOU IN LAS VEGAS!

3 TO 7
